Natural Gas Release, Community of Kingsburg, Fresno County, SPILL 17-1688 (Final)

On 02/24/17 the California State Warning Center (CSWC) received a report from Southern California Gas (So Cal Gas) advising of a ruptured main gas line.

- So Cal Gas requested residents to conserve gas.
- There were no evacuations or interruption of service.
- Per California Utilities Emergency Association (CUEA) on 02/25/17 at 1743 hours:
 - A “T Line” has been impacted and will take some time to reach due to the depth, once this has been completed CUEA will advise on the status and possible estimated time of repair and mitigation.
- The CSWC made notifications per Hazmat SOP.
- Cal OES Duty Officers have been notified.
- The Cal OES Inland Duty Officer (IDO) is monitoring.
- Per CUEA as of 0800 hours on 02/26/17, So Cal Gas reports:
 - Crews worked safely through the night to repair the damaged pipeline and are attempting to construct a bypass around the damage.
 - Currently, the timeline to complete this work has not yet been determined.

SITUATION SUMMARY

Oroville Dam Auxiliary Spillway Incident

On 02/12/17 at 1603 hours the California State Warning Center (CSWC) received notification from the Department of Water Resources (DWR) automated line that the Oroville Dam was in failure status due to extreme scouring of the auxiliary spillway. The CSWC are made notifications according to SOP. All down stream warning points were notified.

Per the DWR Flood Operations Center and California Data Exchange Center (CDEC) as of 02/27/17 at 1000 hours:

- Current releases from Oroville Dam (36,000 cfs) are within the downstream channel capacities in the Feather River.
- Inflows are at 32,000 cfs.
- The current lake elevation is 838.14 feet. As result, no water is flowing over the auxiliary emergency spillway.
- The plan to prevent further erosion utilizes trucks, helicopters, and hand crews to move large rocks and gravel to fill holes in the emergency spillway.
- On 02/26/17, DWR notified the CSWC that starting at 0645 hours on 06/27/17 they will begin gradually ramping down outflows from the Oroville Reservoir. Flows will be reduced from 50,000 cfs. throughout the day and eventually reach zero in the afternoon.

SITUATION SUMMARY

2017 February Winter Storms

Cal OES Inland Region

- Many Operational Areas are dealing with high water levels and other impacts from the February storms.

Flooding

Tuolumne County, Don Pedro Reservoir

On 2/24/2017, The Army Corps of Engineers denied Turlock Irrigation District's (TID) request for a deviation to continue to spill until the reservoir reaches 815' elevation.

- Based on that, and following controlled releases from Hetch Hetchy, TID will begin following the Spill control manual and will close the spillway gates accordingly.
- Lake Don Pedro is currently at 829' and its physical capacity is 830'.

Levee Breach

San Joaquin County

On 02/20/17 at 1945 hours, the California State Warning Center (CSWC) received notification from the National Weather Service advising a levee break occurred on the right bank of the San Joaquin River, San Joaquin County.

- Per the Cal OES Inland Duty Officer (IDO) on 02/26/17:
 - Due to levee break on RD 2075, there are active flood fighting operations in the area and all residents of rural south Manteca should remain vigilant and alert. Board Chair promulgated road closure to restrict levee access for operations.
 - Promulgated Waterway closure of San Joaquin River, Old River, Paradise Cut, and most of Delta south of Deep Water Channel closed to boating traffic for safety of flood-fight activities, wake reduction, safety from levee breach, and search & rescue.
 - Construction began on 02/25/17 and is currently estimated to be 50% complete as of 02/27/17.
- Reclamation District (RD) 2058: The erosion site was evaluated and it was determined to be an imminent threat.
 - A contractor was mobilized to the site on 02/26/17 and will start repairs on 02/27/17.
- RD 2064: Approximately 25 boils carrying material covering approximately 1,200 feet were reported.
 - ICT 4 is recommending constructing a 1,400 foot seepage berm. A PL 84-99 request was submitted to the United States Army Corp of Engineers (USACE).

WEATHER OF CONCERN

Weather of Concern

- A weak storm will produce low snow levels and moderate to heavy precipitation this afternoon in California.
- **Active Weather Warnings, Watches and Advisories by County:**
http://www.wrh.noaa.gov/sto/brief/wwa_bc_cal.php

WEATHER SYNOPSIS BY REGION

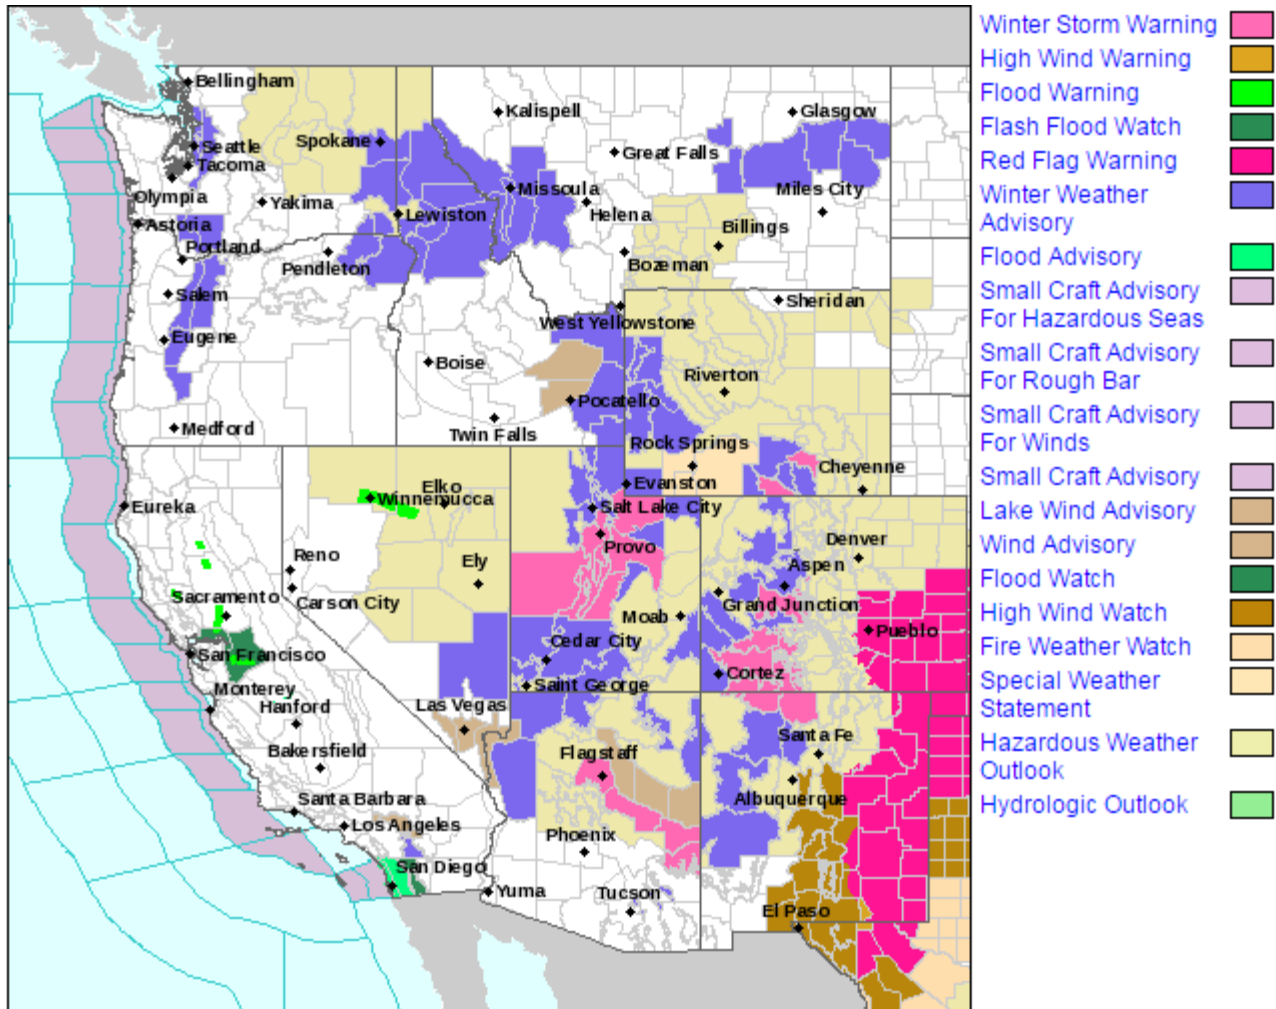

NORTHERN CALIFORNIA

A cold trough will be moving through the region from the north today into Tuesday. Quite a bit of cloudiness will remain over the region into Tuesday, especially in the north and over the mountains. This cold system will also bring some showers to the northern areas through Tuesday, although fewer are expected Tuesday than today. Wednesday a high pressure ridge will be moving into the region and it will last into Friday with dry weather. Afternoon high temperatures will be pretty seasonable with the warmest areas in the lower and mid 60s. Overnight lows will mostly be unseasonably chilly, however. The weather pattern at the end of the week is quite uncertain, but it appears probable that another wet low pressure trough will arrive Friday with some precipitation for the northwest areas. Rain and mountain snow are expected to develop and spread across more of the region Saturday and Sunday. Snow levels may drop to around 2000 feet in the northwest and 3500 feet in the south Sunday.

SOUTHERN CALIFORNIA

A Pacific trough dropping down the West Coast will bring scattered showers to most of the region through tonight. An area of high moisture will move into the region south and east of Los Angeles County this afternoon and evening bringing a period of rain to this part of the area. Most locations south and east of Los Angeles County will receive between 1 and 3 inches of rainfall. Elsewhere, most locations will receive less than a quarter inch of rainfall through tonight. The snow level will be between 4,000 and 5,000 feet. This trough will also bring south to west winds of 20 to 30 mph with gusts to 50 mph to the wind prone mountain and desert locations through tonight. Temperatures will be 10 to 15 degrees below normal today, with 30s to low 40s across the mountains and upper 40s and 50s in the valleys. Northwest flow on the back side of the trough will continue to bring cool temperatures to the region Tuesday, but temperatures will warm around 5 degrees due to abundant sunshine. Significant warming along with low humidity will occur Wednesday through Friday as a ridge of high pressure builds into California from the Pacific Ocean. Temperatures will be around 10 degrees above normal and humidity will be mainly in the single digits and teens away from the San Joaquin Valley and immediate coast Thursday and Friday. Light offshore flow will take place Wednesday through Friday. A trough will move inland into the Pacific Northwest bringing cooling, higher humidity, and onshore flow to the area this weekend. At this time, no rainfall is expected with this trough.
